

TestFactoryBase

TestFactoryBase

TestFactoryImpl< TestClass >

```
graph BT; A[TestFactoryImpl< TestClass >] --> B[TestFactoryBase]; A --> C[TestFactoryBase];
```

The diagram illustrates a class hierarchy. At the bottom, a box labeled 'TestFactoryImpl< TestClass >' has two arrows pointing upwards to two separate boxes at the top, both labeled 'TestFactoryBase'. This indicates that 'TestFactoryImpl< TestClass >' inherits from both 'TestFactoryBase' instances.
