

TestPartResultReporterInterface

TestPartResultReporterInterface

DefaultPerThreadTestPartResultReporter

```
graph BT; D[DefaultPerThreadTestPartResultReporter] --> I[TestPartResultReporterInterface];
```

The diagram illustrates a class hierarchy. At the top, there are two identical boxes labeled 'TestPartResultReporterInterface'. Below them, centered, is a box labeled 'DefaultPerThreadTestPartResultReporter'. A horizontal line connects the two top boxes, and a vertical line descends from its center to the top of the bottom box. An arrow points from the bottom box up to the left 'TestPartResultReporterInterface' box, indicating that the bottom class implements the left interface.
